

PRODUCT

2L Body

Upholstery fabric category	pigmented leather with fine embossing
Leather thickness according to DIN EN ISO 2589	1,1 - 1,3 mm

CTL® GmbH

QUALITY FEATURES

The product complies with quality requirements for upholstery leather according to DIN EN 13 336:2012

Light fastness EN ISO 105-B02	>5
Colour fastness to rubbing EN ISO 11640/11641 dry/wet/sweat solution	4/3-4/3-4
Behaviour at permanent folding DIN EN ISO 5402-1 based on DIN 53359 – 50,000 cycles	no tears
Burning behaviour EN 1021-1/BS 5852-0 cigarette test	passed
MAK amines, azo dyes EN 14362-1 & 3	not detectable
Chlorophenols/PCP, TeCP, TriCP SOP 4309	not detectable
Chrome (VI) content DIN EN ISO 17075	not detectable

PROPERTIES OF THE COVER FABRIC

BODY combines a silk-matt surface finish and the typical properties of high-quality cowhide leather. Thanks to minimum embossing, a particularly uniform and homogenous aesthetics is achieved, while the natural characteristics of the leather are maintained. This fact lends BODY extraordinary resistance and outstanding softness without compromising its individuality. Despite its uniform appearance, the cowhide leather is characterised by striking grain structures with a distinct appearance that turns every piece of furniture into a highlight.

BODY is a slightly embossed type of leather with a thickness of 1.1 to 1.3 mm and is available in subdued colours. Tanning is performed in barrels with a mineral-base tan. It is additionally equipped with an extremely thin pigment layer.

Other test results are available on request from designwerk.
