| Chlorophenols/PCP, TeCP, TriCP SOP 4309 | not detectable |
| Chrome (VI) content DIN EN ISO 17075 | not detectable |

Other test results are available on request from designwerk.

PROPERTIES OF THE COVER FABRIC

ULTRASOFT will captivate you – again and again! A softness that can only come from combining the best raw material with top-quality leather craftsmanship, impressively combined with a fine, smooth surface. There is no mechanical embossing to detract from this impression. The visible natural features make every skin unique. A minimal, lightly pigmented finish gives a more even look.

Wiping with a clean, slightly damp cloth is usually sufficient for cleaning. In any case, avoid using aggressive cleaning agents or grease-containing care products, which might damage the material. If in doubt, please ask your authorised dealer.

Do not place your furniture next to sources of heat (radiators, fireplaces) and avoid strong, direct sunlight. Discolouring due to cushions and/or clothing fabrics does not represent a defect of the upholstery fabric. Colour and texture deviations are typical for this product and do not entitle users to any claims.
