Information Merengue Outdoor

Dynamic. Vibrant. Practical. Thanks to elaborate, carefully considered modular elements and new types of cushions, Merengue Outdoor can be individually configured to ensure that all needs are completely fulfilled. Special consideration was placed on the flexible back and arm sections, which can be freely placed and arranged as your heart desires. Does the cheeky look of Merengue Outdoor make you want to shake your hips? With this elegant model, we have succeeded in making unrivalled indoor comfort available for outdoor use.

Including: **new "easyjack" connector system for maximum flexibility**

Accessories (optional): **various cushions in different sizes (also only in outdoor-compatible upholstery covers)**

Foot available in:

B
mat black

PURCHASE PRICE AND TYPE LIST

Specifics Merengue Outdoor

FRAME

All load-bearing parts of the frame are made of moisture-resistant plywood panels with a phenolic resin coating. The cut edges of the material are sealed twice with a waterproof solution: once after the panels have been cut to size and again after the frame has been completed.

UPHOLSTERY STRUCTURE

The straps used for the underpadding are weatherproof and quick-drying. The foams are also specifically designed for outdoor use: the extremely open cells with quick-drying and antibacterial features ensure that water and moisture can run off or through, which also shortens the overall drying time. The foams are also resistant to chlorine and salt water.

TOTAL MATERIALS

All components used in the Merengue Outdoor model have been carefully selected for outdoor use. The materials are protected with waterproof sealants and all metal parts (staples, threads) are made of stainless steel, which makes them perfectly suitable for long-term outdoor use.

WAVE FORMATION

Forming waves is a typical feature of this model. This is caused by the different qualities of the cover materials and the way in which fabric and leather respond to the impacts of everyday life. Body heat, weight and humidity have different effects on the materials, which is why the wave formation is a natural response of more casual models.

COLOUR DEVIATIONS

Please note that natural materials such as leather and wood are as individual in their structure and colour as nature itself. We make every effort to provide you with an item that is as close as possible to the colour sample. However, please excuse that the colour of delivered items may vary, which does not constitute a defect.

RESERVATION

We reserve the right to improve products and their quality if technological progress so demands or if this contributes to maintain delivery capacity. The same applies to the correction of faulty details.

FSC®

Since September 2022 all our sofas, armchairs and beds are FSC® certified (FSC®-C112933). FSC® stands for 'Forest Stewardship Council®', which is an international certification system for more sustainable forest management. Products that are certified to carry this label are exclusively made from sustainable wood.
